Dimension*

Use the potential of the drive

Experience the power

Feel the technology

Performance enhancement via the internet, without opening control units, with one system – safe, simple and quick.

O.CT IPRO - Intelligent PROgrammierung

With its unique system, O.CT IPRO revolutionises performance and consumption enhancement.

IPRO permits safe, simple and quick programming of engine control units via the OBD2 diagnostic interface.

The required data are provided by O.CT Tuning directly via the internet.

Become an O.CT IPRO sales partner

IPRO was developed exclusively for O.CT sales partners so as to be able to enhance vehicle performance on the spot all over the world. Benefit from the advantages that IPRO offers.

O.CT IPRO „New Generation“

IPRO is now into a second generation.

After 7 very successful years on the market, the first generation IPRO is being replaced by the IPRO „New Generation“.

Many years of experience and know-how have flowed directly into the development of the new IPRO and guarantee the highest standards and the latest technology.

IPRO means:

- Autonomous, portable, stand-alone solution (no additional PC required by the sales partner)
- Encrypted data transfer via the internet
- Easiest possible user control
- Unambiguous device recognition, misuse excluded
- 24-hour online performance enhancement possible
- TÜV / DTC approval and O.CT guarantee included
- Multilingual

IPRO „New Generation“ offers many new features and a completely new user interface.

Advantages:

- Easiest possible user control via a high resolution 7" TFT touchscreen display Touchscreen Display
- WLAN option
- Error log deletion / Vehicle diagnosis
- Automatic vehicle identification with many models
- USB connection
- Memory expansion possible
- Lithium polymer battery with no memory effect
- Ergonomic, robust design
- Detailed onscreen help via its own help button
- Quick reading and writing processes

The process of performance enhancement with IPRO

- Connect IPRO via the diagnostic interface (OBDII) to the selected vehicle
- Read out current vehicle data
- Connect IPRO to the internet to transfer the data (via LAN or WLAN)
- Download the vehicle-specific optimised tuning file from the O.C.T servers
- Transfer of the downloaded vehicle-specific optimised tuning file from IPRO to the control unit
- Required credits are charged directly in IPRO
- Comparison of IPRO with the database
- Delete error log directly in IPRO

O.C.T Tuning developments

O.C.T. Oberscheider Tuning stands for the highest standards and quality.

A highly motivated team with many years of experience, one of the most up-to-date 4x4 performance test benches in Europe and the very latest IT and high tech data capture systems guarantee the customer perfectly tuned performance enhancement for a wide range of vehicles.

All performance enhancement offered is developed entirely in-house by O.C.T. Tuning.

The values shown on the vehicle data-sheets have been recorded on our own test drives using Datron Acceleration measurement devices.

O.C.T Tuning offers a wide range of high quality accessories

O.C.T Tuning specialises in performance enhancement at the highest level. O.C.T Tuning also offers a wide range of special accessories:

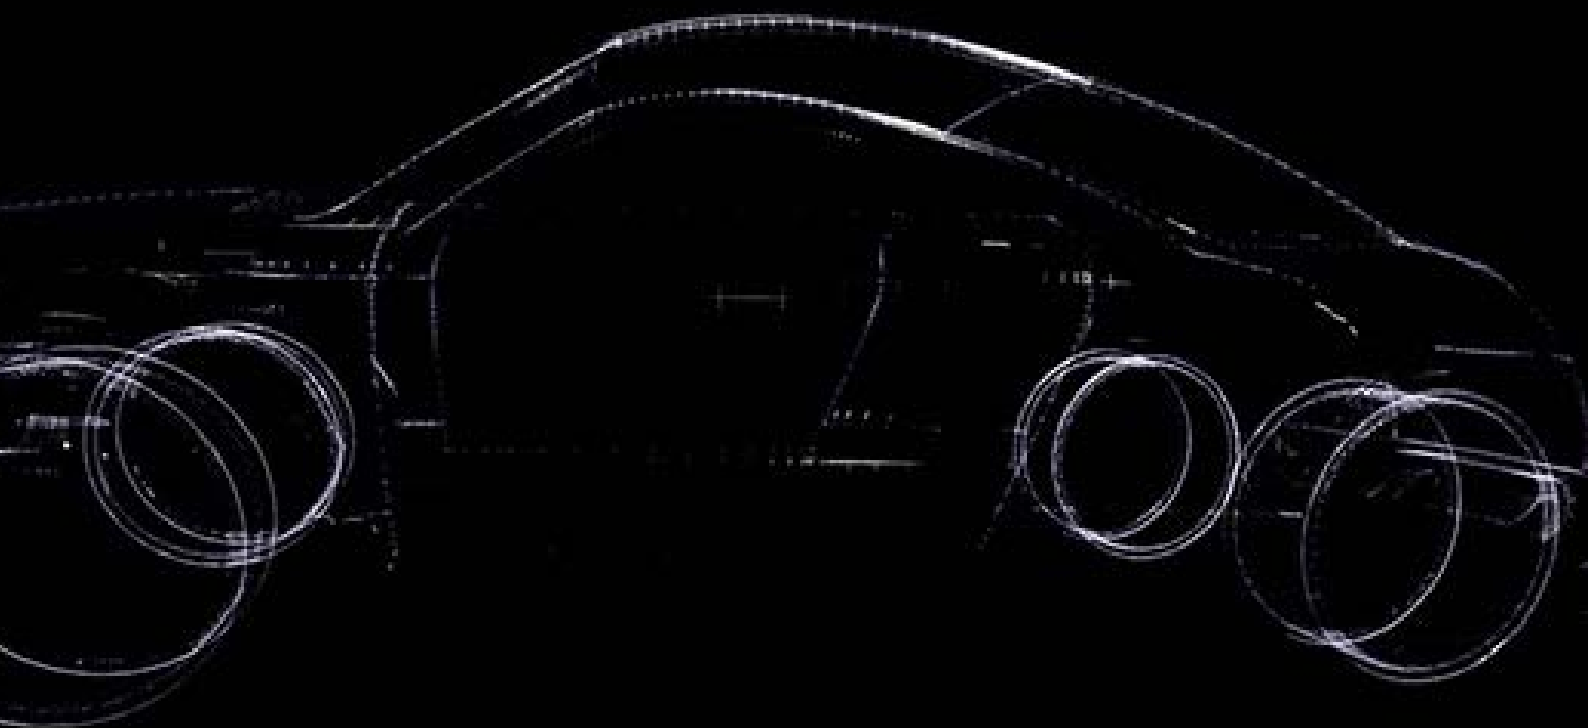

- Aluminium rims
- Braking systems
- Chassis
- Chromium steel exhaust systems
- Intercooler kits

Perfect tuning on our 4x4 test bench and optimally tailored software modifications are the basis of all O.C.T performance enhancement.

Besides pure software modifications, O.C.T offers enhancements in connection with built-in hardware.
